HELP US HELP YOU...

Read this guide carefully.

It is intended to help you operate and maintain your new Wine Chiller properly.

Keep it handy to answer your questions. If you don't understand something or you need more assistance, please call:

Avanti Customer Service
800-220-5570

Keep proof of original purchase date (such as your sales slip) with this guide to establish the warranty period.

CAUTION:

THIS WINE CHILLER IS NOT
DESIGNED FOR THE STORAGE
OF MEDICINE OR OTHER
MEDICAL PRODUCTS.

Write down the model and serial numbers.

You'll find them on a plate located on the rear outside wall of the Wine Chiller.

Please write these numbers here:

Date of Purchase

Model Number

Serial Number

Use these numbers in any correspondence or service calls concerning your Wine Chiller.

If you received a damaged Wine Chiller, immediately contact the dealer (or builder) that sold you the Wine Chiller.

Save time and money. Before you call for service, check the Troubleshooting Guide. It lists causes of minor operating problems that you can correct yourself.

IF YOU NEED SERVICE

We're proud of our service and want you to be pleased. If for some reason you are not happy with the service you receive, here are some steps to follow for further assistance.

FIRST, contact the people who serviced your Wine Chiller. Explain why you are not pleased. In most cases, this will solve the problem.

NEXT, if you are still not pleased, write all the details, including your telephone number, and send it to:

Customer Service
Avanti Products
10880 NW 30 Street
Miami, FL 33172 USA

3. Zone Separator
4. Shelves (4 total)
5. Bottom Zone Fan
6. Leveling Legs
7. Door Hinge Cover
8. Glass Door
9. Integrated Door Handle

IMPORTANT SAFETY INSTRUCTIONS

WARNING	To reduce the risk of fire, electrical shock, or injury when using your appliance, follow these basic precautions:
<ul style="list-style-type: none">• Read all instructions before using the Wine Chiller.• DANGER or WARNING: Risk of child entrapment. Child entrapment and suffocation are not problems of the past. Junked or abandoned appliances are still dangerous . . . even if they will "just sit in the garage a few days".• Before you throw away your old Wine Chiller: Take off the door. Leave the shelves in place so that children may not easily climb inside.• Never allow children to operate, play with, or crawl inside the appliance.• Never clean appliance parts with flammable fluids. The fumes can create a fire hazard or explosion.• Do not store or use gasoline or any other flammable vapors and liquids in the vicinity of this or any other appliance. The fumes can create a fire hazard or explosion.• Do not repair or replace any part of the refrigerator or attempt any servicing unless specifically recommended in the user-maintenance instructions or in published user-repair instructions. Replace the fuse with the same type. <p>-Save these instructions-</p>	

INSTALLATION INSTRUCTIONS

➤ **Before Using Your Wine Chiller**

- Remove the exterior and interior packing.
- Check to be sure you have all of the following parts:
 - 4 Shelves
 - 1 Instruction Manual
- Clean the interior surface with lukewarm water using a soft cloth.

➤ **Installation of Your Wine Chiller**

- This Wine Chiller is designed to be free standing installation only, and should not be recessed or built-in (Fully recessed).
- Place your Wine Chiller on a surface that is strong enough to support it when it is fully loaded.
- Allow 5 inches of space between the back and sides of the refrigerator, which allows the proper air circulation to cool the heat sink.
- Locate the Wine Chiller away from direct sunlight and sources of heat (stove, heater, radiator, etc.). Direct sunlight may affect the acrylic coating and heat sources may increase electrical consumption. Extreme cold ambient temperatures may also cause the unit not to perform properly.
- This Wine Chiller uses thermoelectric refrigeration technology (no compressor) and is not designed for storage in hot areas like garages, warehouses or outdoors since it is designed to operate at a maximum of 30 degrees below the ambient temperature.
- Avoid locating the unit in moist areas.
- Plug the Wine Chiller into an exclusive, properly installed-grounded wall outlet. Do not under any circumstances cut or remove the third (ground) prong from the power cord. Any questions concerning power and/or grounding should be directed toward a certified electrician or an authorized Avanti Products service center.
- After plugging the Wine Chiller into a wall outlet, allow the unit to cool down for 2-3 hours before placing any items in the compartment.

➤ **Electrical Connection**

⚠ Warning ⚠

Improper use of the grounded plug can result in the risk of electrical shock. If the power cord is damaged, have it replaced by an authorized Avanti Products service center.

This appliance should be properly grounded for your safety. The power cord of this appliance is equipped with a three-prong plug which mates with standard three prong wall outlets to minimize the possibility of electrical shock.

Do not under any circumstances cut or remove the third ground prong from the power cord supplied. For personal safety, this appliance must be properly grounded.

This appliance requires a standard 115 Volt AC / 60Hz electrical ground outlet with three-prong. Have the wall outlet and circuit checked by a qualified electrician to make sure the outlet is properly grounded. When a standard 2-prong wall outlet is encountered, it is your responsibility and obligation to have it replaced with a properly grounded 3-prong wall outlet.

The cord should be secured behind the appliance and not left exposed or dangling to prevent accidental injury.

The appliance should always be plugged into its own individual electrical outlet which has a voltage rating that matches the rating label on the appliance. This provides the best performance and also prevent overloading house wiring circuits that could cause a fire hazard from overheated. Never unplug the appliance by pulling the power cord. Always grip the plug firmly and pull straight out from the receptacle. Repair or replace immediately all power cords that have become frayed or otherwise damaged. Do not use a cord that shows cracks or abrasion damage along its length or at either end. When moving the appliance, be careful not to damage the power cord.

➤ **Extension Cord**

Because of potential safety hazards under certain conditions, it is strongly recommended that you do not use an extension cord with this appliance. However, if you must use an extension cord it is absolutely necessary that it be a UL/CUL-Listed, 3-wire grounding type appliance extension cord having a grounding type plug and outlet and that the electrical rating of the cord be 115 volts and at least 10 amperes.

OPERATING YOUR WINE CHILLER

It is recommended you install the Wine Chiller in a place where the ambient temperature is between 23°-26°C/ 72°-78°F. If the ambient temperature is above or below recommended temperatures, the performance of the unit may be affected. For example, placing your unit in extreme cold or hot conditions may cause interior temperatures to fluctuate. The range of 8°-18°C/46°-64°F may not be reached.

Recommended Temperatures for Chilling Wine.

Red Wines	15° - 19° C	58 – 64° F
Dry/White Wines	9° - 14° C	48 – 57° F
Rose Wines	10° - 11° C	49 – 51° F
Sparkling Wines	5° - 9° C	40 – 47° F

Temperature Ranges For Your Wine Chiller

Upper Zone	7 - 12° C	44 – 54° F
Lower Zone	11 - 18° C	52 - 64° F

CONTROL PANEL

11	Control Panel "Lock" Button
12	Upper Zone Temperature UP Button
13	Upper Zone Temperature DOWN Button
14	Digital Display Window
15	Lower Zone Temperature UP Button
16	Lower Zone Temperature DOWN Button
17	°F / °C Display Selector Button

You can select temperature display setting from Fahrenheit to Celsius degree by pushing this button (marked # 17 in the graphic above). Fahrenheit or Celsius degrees indicator will appear in white color in the LCD temperature display window with blue background.

- **SETTING THE TEMPERATURE CONTROL**
- You can set the temperature for each zone (Upper and Lower) as you desire by pushing the or button on the control panel for each zone. The temperature that you desire to set will increase 1°F or 1°C if you push the button once, on the contrary the temperature will decrease 1°F or 1°C if you push the button once.
- When you store mostly red wines, the temperature which you control by pushing the above two buttons need to be set at between 15° - 19°C (58° - 64°F).
- When you store mostly white wines, the temperature needs to be set at between 9° - 14°C (48° - 57°F).
- When you store mostly sparkling wines, the temperature needs to be set at between 5° - 9°C (40° - 47°F).

NOTE:

- When you use the wine chiller for the first time or restart the wine chiller after having been shut off for a long time, there could be a few degrees variance between the temperature you select and the one indicated on the LCD readout. This is normal and it is due to the length of the activation time. Once the wine chiller is running for a few hours everything will be back to normal.

➤ **Storage Capacity**

NOTE: You can place 18 standard bottles in this wine chiller.

Many bottles may differ in size and dimensions. As such the actual number of bottles you may be able to store may vary. Bottle capacities are approximate maximums when storing traditional Bordeaux 750ml bottles and include bulk storage.

➤ **Interior Light**

You can turn the interior light ON or OFF by pushing the button marked with the "bulb" symbol .

The light will be turned off automatically if it remains ON for 10 minutes. You have to push the button marked with the "bulb" symbol  again and the light will turn back on.

CARE AND MAINTENANCE

➤ **Cleaning Your Wine Chiller**

- UNPLUG the Wine Chiller, and remove all items including shelves.
- Wash the inside surfaces with a warm water and baking soda solution. The solution should be about 2 tablespoons of baking soda to a quart of water.
- Wash the shelves with a mild detergent solution.
- Wring excess water out of the sponge or cloth when cleaning area of the controls, or any electrical parts.
- Wash the outside cabinet with warm water and mild liquid detergent. Rinse well and wipe dry with a clean soft cloth.
- Do not use steel wool or steel brush on the stainless steel. These will contaminate the stainless steel with steel particles and rusting may occur.

CAUTION

Failure to unplug the Wine Chiller could result in electrical shock or personal injury.

➤ **Power Failure**

- Most power failures are corrected within a few hours and should not affect the temperature of your appliance if you minimize the number of times the door is opened. If the power is going to be off for a longer period of time, you need to take the proper steps to protect your contents.

➤ **Vacation Time**

- **Short vacations:** Leave the Wine Chiller operating during vacations of less than three weeks.
- **Long vacations:** If the appliance will not be used for several months, remove all items and unplug the power cord. Clean and dry the interior thoroughly. To prevent odor and mold growth, leave the door open slightly: blocking it open if necessary.

➤ **Moving Your Wine Chiller**

- Remove all bottles.
- Securely tape down all loose items (shelves) inside your appliance.
- Tape the door shut.
- Protect outside of appliance with a blanket, or similar item.

➤ **Energy Saving Tips**

- The Wine Chiller should be located in the coolest area of the room, away from heat producing appliances, and out of the direct sunlight.
- One characteristic of thermoelectric units is the length of time it requires to recover from having the door opened and shut frequently. It may be necessary to wait longer for the temperature to return to its former level once the door has been opened for too long. This is normal for this type of unit.
- Thermoelectric technology costs just pennies to operate. It is environmentally friendly due to the lack of CFC's.

PROBLEMS WITH YOUR WINE CHILLER?

You can solve many common Wine Chiller problems easily, saving you the cost of a possible service call. Try the suggestions below to see if you can solve the problem before calling the servicer.

TROUBLESHOOTING GUIDE

PROBLEM	POSSIBLE CAUSE
Wine Chiller does not operate.	Not plugged in. The circuit breaker tripped or a blown fuse.
Wine Chiller is not cold enough.	Check the temperature control setting. External environment may require a higher setting. The door is opened too often. The door is not closed completely. The door gasket does not seal properly. The Wine Chiller does not have the correct clearances. Abnormal voltage.
The light does not work.	Not plugged in. The circuit breaker tripped or a blown fuse. The light button is "OFF".
Vibrations.	Check to assure that the Wine Chiller is level.
The door will not close properly.	The Wine Chiller is not level. The door was reversed and not properly installed. The gasket is dirty. The shelves are out of position.

SERVICE FOR YOUR WINE CHILLER

We are proud of our customer service organization and the network of professional service technicians that provide service on your Avanti appliances. With the purchase of your Avanti appliance, you can have the confidence that if you ever need additional information or assistance, the Avanti Products Customer Service team will be here for you. Just call us toll-free.

AVANTI PRODUCTS CUSTOMER SERVICES

Product Information 800-323-5029	Whatever your questions are about our products, help is available.
Part Orders 800-220-5570	You may order parts and accessories that will be delivered directly to your home by personal check, money order, Master Card, or Visa.
In-Home Repair Service 800-220-5570	An Avanti Products authorized service center will provide expert repair service, scheduled at a time that is convenient for you. Our trained servicers know your appliance inside and out.

YOUR Avanti Products WARRANTY

Staple your sales receipt here. Proof of original purchase date is needed to obtain service under warranty.

WHAT IS COVERED**LIMITED ONE-YEAR WARRANTY**

For one year from the date of purchase by the original owner, Avanti Products will, at its option, repair or replace any part of the unit, which proves to be defective in material or workmanship under normal use. During this period Avanti Products will provide all parts and labor necessary to correct such defects free of charge, so long as the unit has been installed and operated in accordance with the written instructions in this manual. In rental or commercial use, the warranty period is 90 days. Avanti Products will provide you with a reasonably similar replacement product that is either new or factory refurbished. All Avanti Appliances of 3.5 cubic feet capacity or less must be brought/sent to the appliance service shop for repair.

WHAT IS NOT COVERED

- Content losses of food or other, due to spoilage.
- Incidental or consequential damages.
- Parts and labor costs for the following will not be considered as warranty:
 - Door springs, and/or frames.
 - Inner door panels, door rails and/or door supports.
 - Light bulbs and/or plastic housing.
 - Plastic cabinet liners.
 - Repairs performed by unauthorized servicers.
 - Shipping and handling costs associated with the replacement of the unit.
- Service calls that do not involve defects in material or workmanship such as customer education, door reversal, or proper installation.
- Service calls that are related to external problems, such as abuse, misuse, inadequate electrical power, accidents, fire, floods, or acts of God.
- Surcharges including, but not limited to, any after hour, weekend, or holiday service calls, tolls, ferry trip charges, or mileage expense for service calls to remote areas, including the State of Alaska
- Replacement of house fuses or resetting circuit breakers.
- Failure of the product if it is used for other than its intended purpose.
- This warranty does not apply outside the Continental USA.

INSTRUCCIONES DE SEGURIDAD

ATENCION

INSTRUCCIONES PARA LA CONEXION A TIERRA

Este aparato electrodoméstico debe estar conectado a tierra. En caso de un cortocircuito eléctrico, la conexión a tierra reduce el riesgo de choque eléctrico proporcionando un cable a tierra con una enchufe de conexión a tierra. Este enchufe debe estar conectado en un tomacorriente instalado correctamente y conectado a tierra.

ADVERTENCIA – El uso inadecuado del enchufe de conexión a tierra puede resultar en un riesgo de choque eléctrico. Consulte con un electricista o persona de reparaciones competente si no comprenden bien las instrucciones de conexión a tierra o si existe alguna duda sobre si el aparato esta conectado a tierra correctamente.

NO USE UN CORDON DE PROLONGACION ELECTRICA

Use un tomacorriente de pared exclusivo. No conecte su vinera a cordones de prolongación eléctrica o junto a cualquier otro electrodoméstico en el mismo tomacorriente de pared.

ADVERTENCIA IMPORTANTE:

Una vinera vacía es una atracción muy peligrosa para los niños. Saque todas las juntas, pestillos, tapas o puerta de todo electrodoméstico que no esté en uso, o tome alguna medida para asegurar que no presente peligro.

INSTRUCCIONES DE INSTALACION

Saque los embalajes exteriores, limpie bien el exterior con un paño suave seco, y el interior con un paño húmedo y tibio. Evite colocar la vinera cerca de una fuente de calor, luz de sol directa, o lugar húmedo.

Ubicación

1. Seleccione un lugar con su piso fuerte y nivelado.
2. Deje cinco pulgadas de espacio entre la parte posterior de la vinera y toda pared contigua.
3. Las bodegas termoeléctricas necesitan cierto tiempo de recuperación cuando la puerta se abre y se deja abierta por mucho tiempo. Esto es normal para este tipo de unidad.
4. Evite la luz directa del sol o calor. La luz directa del sol puede afectar la capa de acrílico. Las fuentes de calor en su proximidad provocarán un consumo mayor de electricidad.
5. Para un mejor desempeño, nivele la vinera utilizando las patas ajustables o tornillos niveladores.

OPERACION

Para evitar vibraciones, el compartimiento interior debe estar bien nivelado. La temperatura variará dependiendo de la cantidad de botellas almacenadas y la frecuencia con que se abre la puerta.

Cuando la vinera no se use por un período largo, desconecte el enchufe y deje la puerta entreabierta.

CONTROL DE TEMPERATURA:

Se recomienda que Ud coloque su vinera en un lugar donde la temperatura ambiental se mantenga entre 23°-26°C / 72°-78°F.

Si la temperatura ambiental oscila afuera de esos límites, pueda afectar la temperatura de la unidad. Por ejemplo, si su unidad está situada en lugares donde hay temperaturas muy frías o calientes también puede afectar la temperatura de la unidad y no alcanzara los límites (5°-19°C/40°-65°F).

Temperaturas recomendadas para enfriar vinos:

Vinos rojos	15° - 19° C	58 – 65° F
Vinos blancos	9° - 14° C	48 – 57° F
Vinos tintos	10° - 11° C	49 – 51° F
Vinos espumantes	5° - 9° C	40 – 47° F

Rango de Temperatura de su vinera

Zona superior	7 - 12° C	44 – 54° F
Zona Inferior	11 - 18° C	52 - 64° F

Panel de controles

11	Botón de Activar / Desactivar el panel del control
12	Botones para programar la temperatura de la zona superior
13	
14	Pantalla Digital
15	Botones para programar la temperatura de la zona inferior
16	
17	Botón para cambiar la pantalla digital de°F a °C

Control de temperatura

Su unidad viene equipada con un control de temperatura electrónico con una pantalla digital.

Ud. se puede seleccionar la temperatura preferida a su gusto presionando los botones marcados

o . Cuando Ud. presione uno de los dos botones por primera vez la temperatura seleccionada originalmente en la fábrica. (12°C / 54°F).

La temperatura que Ud. selecciona subirá 1°C/F cada vez que presione el botón marcado al contrario la temperatura bajará 1°C/F cada vez que presione el botón marcado

AVISO:

Cuando Ud. encienda su vinera por primera vez o después de un largo tiempo de estar apagado, habrá una diferencia entre la temperatura que Ud. selecciona y la temperatura indicada en la pantalla digital. Este situación es normal debido al tiempo de que estuvo apagado. En cuanto la unidad esté encendida por un par de horas la temperatura estará normal.

Luz interior

Ud. puedes encender o apagar la luz interior presionando el botón marcado . La luz interior se apagará automáticamente si esta encendida por 10 minutos seguidos. Ud. necesita presionar el botón de nuevo para encender la luz.

CUIDADO Y MANTENIMIENTO

Limpieza

Para limpiar el interior, use un paño suave con una solución de una cucharada de bicarbonato de sodio por cada cuarto de agua, o una solución de espuma de jabón suave, o un detergente suave. Para lavar las rejillas, sáquelas deslizándolas con cuidado, y use una solución de detergente suave; luego séquelas con un paño suave. Limpie el exterior con un paño húmedo suave y un poco de detergente suave o productos de limpieza para electrodomésticos.

Período de vacaciones

Para períodos cortos de vacaciones, deja los controles en su programación corriente. Durante ausencias más largas;

- (a) saque todas las botellas,
- (b) desconecte la vinera del tomacorriente,
- (c) limpie bien la vinera,
- (d) deje la puerta abierta para evitar la formación de condensación, moho u olores.

Corte de corriente

La mayoría de los cortes de corriente se corrigen en una o dos horas y no afectarán las temperaturas de su vinera. Sin embargo, Ud. deberá reducir la cantidad de veces que abra la puerta cuando la corriente esté apagada. Durante los cortes de corriente de larga duración, tome medidas para proteger sus botellas de vino.

Si Ud. se muda

Saque o asegure todos los artículos dentro de su vinera. Para evitar que los tornillos nivelantes se averíen, gírelos completamente hacia la base.

Algunas reglas importantes para el uso correcto de la vinera.

- Las bebidas deben guardarse en botellas cerradas.
- No sobrecargue el compartimiento interior.
- No abra la puerta a menos que sea necesario.
- Si la vinera se guardara sin uso por períodos largos, se sugiere que, luego de una limpieza cuidadosa, se deje la puerta entreabierta para permitir que el aire circule dentro de la caja y evitar una posible formación de condensación, moho u olores.
- Nunca cubra los estantes del compartimiento para vinos con papel de aluminio o cualquier otro material para cubrir estantes que puedan obstruir la circulación del aire.

REGISTRATION INFORMATION

Thank you for purchasing this fine Avanti product. Please fill out this form and return it within 100 days of purchase and receive these important benefits to the following address:
